

Astrata Barcoding

Get the power of Astrata on the go – streamline data entry into Costpoint from anywhere!

Boost efficiency and accuracy by using the app's barcode scanning feature to complete transactions in real time, whether you're on the shop floor or on the go!

How it Works:

Connect

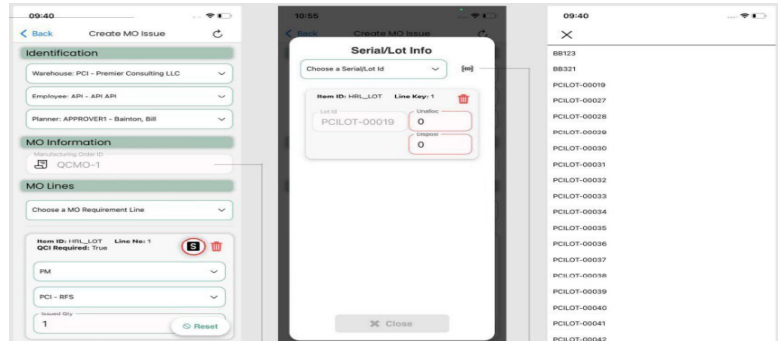

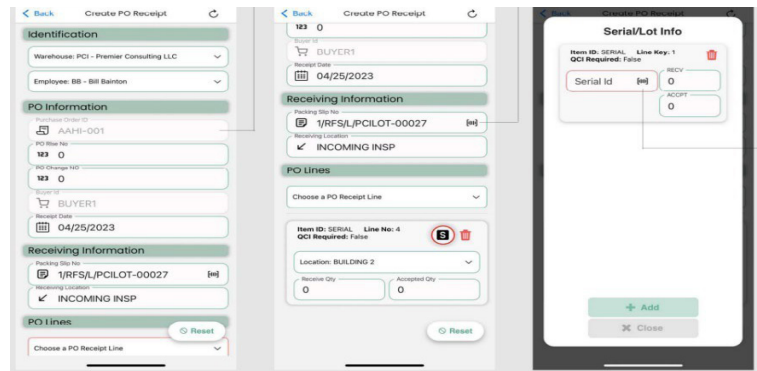

The Astrata mobile app can be installed (and connected to Costpoint) on any apple or android based device with no hardware purchase necessary – just connect to WiFi.

Deploy

As part of our deployment process, we'll seamlessly connect your app to your Costpoint system and provide comprehensive training. And the best part? You'll be up and running in no time! Say goodbye to long implementation times!

Transact

Our user-friendly design includes large buttons and an intuitive interface for easy task completion.

You can use the barcode scanning feature to quickly scan and complete:

Purchase Order Receipts

Sales Order Issues

Manufacturing Order Issues

Physical Inventory Count
