ASTRATA

CREDIT CARD CONNECT

Managing Credit Cards is a time consuming and labor intensive process. Credit Card companies provide limited information around charges and DCAA requires details for all charges.

The Astrata Credit Card platform is specifically designed to interface with Deltek Costpoint and provide you a place to interact with your transactions on a daily basis.

Astrata allows you to route transactions to Deltek Expense and to Accounts Payable for processing.

in addition, Astrata also allows for attachment of receipts and notes on every transaction. This provides an audit history required to meet DCAA requirements when additional detail around your credit transactions not covered under an expense report.

CONNECT CARDS
·user
·password

DAILY TRANSACTIONS
·code A/O (P)
·assign employee

SEND TO EXPENSE
·daily to maintain expenses
·code to holding account

PROCESS AP
·create statement voucher
